

# shaman-monitor

## NAME

shaman-monitor – cluster activity monitor daemon for R-Virtualization clusters.

## SYNOPSIS

```
shaman-monitor -c cluster_name [options...]
```

## DESCRIPTION

**shaman-monitor** is a daemon responsible for monitoring, controlling cluster activity on R-Virtualization nodes and providing high availability support.

## OPTIONS

### **-c, -cluster <name>**

Set the *name* of the cluster to operate on. If (-c) is omitted, the **shaman-monitor** service will operate on the cluster specified in the **shaman.conf(5)** file.

### **-d, -daemonize**

Daemonize the **shaman-monitor** service after start-up.

### **-l, -log <path>**

Set the *path* to the log file.

### **-v, -verbose**

Increase the log verbosity level specified in the **shaman.conf(5)** file.

### **-q, -quiet**

Disable printing of messages to the console.

### **-V, -version**

Print the **shaman-monitor** version.

### **-h, -help**

Display the list of allowed options.

## FILES

*/etc/shaman/shaman.conf*

Main **shaman-monitor** configuration file; see **shaman.conf(5)** for details.

*<vstorage mount point>/shaman/config*

Secondary **shaman-monitor** configuration file; see **shaman.conf(5)** for details.

*/usr/share/shaman/notify*

*/usr/share/shaman/schedule*

*/usr/share/shaman/relocate*

*/usr/share/shaman/fence*

*/usr/share/shaman/describe*

Main resource controlling scripts used by **shaman-monitor**; see **shaman-scripts(8)** for details.

## DIAGNOSTICS

**shaman-monitor** returns 0 upon successful execution. If something goes wrong, it returns an appropriate error code:

1	System error.
2	Failed call of R-Storage API.
3	<b>shaman-monitor</b> is already running.
4	Invalid value specified for the option.
5	This node is not registered in the cluster.
6	Script execution timeout expired.
7	Failed to validate the R-Storage lease.
8	R-Storage cluster version is not supported.
11	Execution is interrupted by a signal.
18	The R-Storage filesystem is not mounted.
19	The R-Storage filesystem mount point is not functional. Remount the filesystem and retry.
20	The Virtiozoo license is not present or expired.
255	Unknown command or option specified.
