

Установка менеджера контейнеров Bastille

```
zfs create -p -o atime=off -o compress=lz4 Data/extensions/bastille
cd /mnt/Data/extensions/bastille
fetch --no-verify-peer
https://raw.githubusercontent.com/JRGTH/xigmanas-bastille-extension/master/b
astille-init && chmod +x bastille-init && ./bastille-init && echo "=> Done!"
```

From [Extensions > Bastille > Configuration] set the following parameters:

```
bastille_zfs_enable "YES"
bastille_zfs_zpool "Data/extensions"
bastille_zfs_prefix "bastille"
```

From [Extensions > Bastille > Maintenance] check the ZFS support box and click Save.
